## VII. Acknowledgements

The work on this paper started in 1992 after the NAFO Scientific Council Standing Committee on Publications (STACPUB) in 1991 had proposed to invite me to review the fishery, biology and assessment of the West Greenland cod stock after 1949. Although retired since October 1992, I found myself so heavily engaged in work on archiving materials on fisheries research in Greenland waters in the present century, that the work on this cod publication was delayed very much. I extend my sincere appreciation to STACPUB and the NAFO Secretariat for the considerations extended to me. I admire and I am thankful for the patience shown to me, and deeply indebted for editorial and technical help by T. Amaratunga.

I thank the former Greenland Fisheries Research Institute (GFRI), now integrated into The Greenland Institute of Natural Resources and its director, Klaus Høyer Nygaard for providing necessary office facilities in the first four years after my retirement, and I am deeply indebted to Hanne K. Petersen, director of the Department of Arctic Environment under the National Environmental Research Institute (the department until September 1987, was a part of GFRI) for supplying office facilities after the former institute was moved to Greenland in 1996. I thank employees of both institutes for valuable assistance in various matters, not the least for guidance and assistance by Per Kannevorff in computer work. The Greenland student Nikoline Hansen assisted in setting up Tables and Figures.

I would like to repeat here my great appreciation for valuable comments by international colleagues on the statistics first set up (Horsted, MS 1994), *viz.* to:

Claude A. Bishop, Canada  
Hans-Peter Cornus, Germany  
Richard J. R. Grainger, FAO, Rome  
Jaqueline Hersart de La Villemarqué, France  
Brian W. Jones, England  
Ralph K. Mayo, USA  
Sigfús A. Schopka, Iceland  
Antonio Vazquez, Spain

and to Jens Fynbo, former director of the Royal Greenland Trade Department, Copenhagen
