Journal of Northwest Atlantic Fishery Science

The ICNAF Research Bulletin, initiated by the Standing Committee on Research and Statistics of the International Commission for the Northwest Atlantic Fisheries in 1964, was published annually until 1979, when ICNAF ceased to exist and was replaced by the Northwest Atlantic Fisheries Organization (NAFO). Thus, publication of the ICNAF Research Bulletin terminated with the issue of Number 14 in September 1979.

The Scientific Council of NAFO recognized the need for continuing the publication of a primary scientific journal to provide a medium for the dissemination of the results of investigations on various aspects of the living marine resources of the Northwest Atlantic. It was also recognized that more frequent issues are required than was the case with the ICNAF Research Bulletin, the ultimate aim being 3 or 4 issues per annual volume. Although this volume (for 1980) appears as a single issue, Volume 2 will be published in 2 parts, the first to be issued in June 1981 and the second in December 1981.

3 December 1980
