

Erik Mellentin Poulsen

1900–1985

Dr E. M. Poulsen, who served as Executive Secretary of the International Commission for the Northwest Atlantic Fisheries (ICNAF) from 1952 to 1963, died on 12 January 1985 at the age of 84 years.

Born on 14 July 1900 at Vordingborg in southern Denmark, Erik Poulsen studied at the University of Copenhagen during 1918–25 and was employed as a student in 1920 by the Danish Fisheries Research Laboratory, where he was involved in biological inves-

tigations on cod in Danish waters. His subsequent work as a marine scientist at the Danish Laboratory until 1951 covered a great variety of fishery-related matters including nearly all fish species and crustaceans which are commercially important in Danish waters.

In 1952, he became Executive Secretary of ICNAF, which occupied temporary space at the Biological Station of the Fisheries Research Board of Canada, St. Andrews, New Brunswick. In 1953, the ICNAF Secretariat moved to its Headquarters in Dalhousie University, Halifax, Nova Scotia, where Erik (and his family) spent the next 10 years, organizing meetings of scientists and commissioners and generally taking the lead in the development of research and statistical programs during the early years of ICNAF.

Erik Poulsen returned to the Danish Institute of Fisheries and Marine Research in 1963 and undertook investigations of lobsters and shrimps, as well as several other scientific and administrative tasks, including participation in meetings of the International Council for the Exploration of the Sea (ICES). He retired in July 1970, at the age of 70 years, from his post as Senior Principal Naturalist at the Danish Institute.

Over the 1920–1979 period, Dr Poulsen's publications consist of 70 articles which cover a great variety of topics on the marine resources. His most outstanding contributions are four extensive monographs on the ostracods from the *Dana* Expedition of 1927–28: *Ostracoda-Myodocoda*, Vol. I to III (1962–73), and *Zoogeography of Pelagic Ostracoda* (1977).

His last published work was in 1979, but his interest in marine biology continued until 1982 when his sight began to fail. He was totally blind during his last year.

NOTICE

Biology of Demersal Resources of the North Atlantic Continental Slopes, with Emphasis on Greenland Halibut and Grenadiers

Special Session of the Scientific Council of NAFO, Lord Nelson Hotel, Halifax,
Nova Scotia, Canada, 9–11 September 1987

General Theme

The primary intent of the Special Session is to elicit research papers on Greenland halibut and grenadiers, which have established commercial potential but about which relatively little is known. Although the principal area of interest is the North Atlantic Ocean, papers on Greenland halibut in the North Pacific Ocean are welcomed because the species is the same in both regions. The scope of the Special Session also includes unexploited species which occupy the same or greater depths on the continental slopes of the North Atlantic. They may include benthic invertebrates, but the well-studied species, such as Atlantic cod and the redfishes, are excluded, even though they are distributed along the upper slope areas. Papers which deal with oceanographic and topographic features of the slope areas, especially in relation to the biology of deepwater species, are also invited.

Specific Topics

1. Oceanographic and topographic features of North Atlantic continental slopes
2. Spatial and temporal distribution and abundance of deepwater species
3. Biological characteristics (age and growth, sexual maturity, food and feeding, other relevant features)
4. Species interactions (predator-prey relationships among deepwater species)
5. Biological implications to management

Deadlines

Authors are requested to send titles and brief descriptions of their potential contributions to the Convener by **1 March 1987**. Papers will be selected on the basis of their relevance to the topics indicated above. Authors of selected contributions will be informed by **15 April 1987**.

Completed manuscripts (typescript or good quality photocopy) should be mailed in time to reach the NAFO Secretariat (address below) by **31 August 1987** for mimeographing. An author who cannot provide a copy of the manuscript before the beginning of the meeting must bring 75 copies.

Publication

Publication in the *Journal of Northwest Atlantic Fishery Science* or *NAFO Scientific Council Studies* will depend on the nature and quality of individual contributions.

Convener

Further information may be obtained from the **Convener** (W. R. Bowering) or the NAFO Secretariat.

NOTICE

The Impact of Changes in Environmental Conditions in the North Atlantic on Distribution, Availability and Abundance of Marine Species, with Particular Emphasis on the Labrador and Grand Bank Regions during the early 1980's

Special Session in September 1988

This theme was chosen by the Scientific Council of NAFO for a 3-day session to be held in 1988. The session is tentatively scheduled for 12-14 September 1988. Details of organizational arrangements, including confirmation of time and place, outline of topics to be covered, and deadlines for the submission of abstracts and completed manuscripts will be finalized at the September 1987 Meeting of the Council.

NOTICE

Microfiche of ICNAF Meeting Documents, 1951-79

The International Commission for the Northwest Atlantic Fisheries (ICNAF) came into being in July 1950, and the first annual meeting took place at Washington, USA, in April 1951. From that time until the termination of ICNAF in 1979 (29 annual meetings and numerous special and midterm meetings), documentation of research and statistical activities grew as the Commission's interest expanded from developing the groundwork for scientific investigation of the marine living resources during the 1950's and 1960's to managing more than 70 fish and invertebrate stocks in the Northwest Atlantic during the 1970's, until the 200-mile fishery conservation zones of the coastal states were implemented in 1977. However, ICNAF continued until 1979, when it was replaced by the Northwest Atlantic Fisheries Organization (NAFO).

Under the ICNAF regime, it was the mandate of the Standing Committee on Research and Statistics (STACRES) to keep under review and provide regular assessments of the exploited stocks, and to develop policies and procedures for the collection, compilation, analysis and dissemination of fishery statistics in the Convention Area and adjacent waters. Thousands of meeting documents were generated during the 30-year life of ICNAF, most of which were scientific in nature. The Scientific Council of NAFO recognized the historical value of this long series of ICNAF documents and, in 1983, recommended that all papers related to fishery science and statistics should be assembled and copied on microfiche.

Before 1965, all ICNAF documents were designated "Meeting Documents", with no distinction between documents presented at scientific meetings and those for consideration by Commissioners. During 1965-72, documents were issued in two series, desig-

nated as "Commission Documents" and "Research Documents". During 1973-79, further division occurred with the issue of "Summary Documents". The microfiche series contains all documents from 1951-64, all Research and a few relevant Commission documents for 1965-72, and all Research and Summary documents for 1973-79. The task of locating and preparing the papers for microfiche began in early 1985 and was completed in late 1986. Nearly 2,700 documents (31,500 pages) has been recorded on 632 fiche (98-page format, negative). When organizing the material, an index fiche was included to start the series for each year, to provide the user with ready access to the authors and titles of papers and the document numbers. The title strip on each fiche is color-coded by document series, and contains the name of the document series, the year of issue and the document number(s).

A limited number of microfiche sets are available for immediate shipment on a "first come, first served" basis. When the current supply has been exhausted, subsequent orders will involve a delay of approximately 4-5 weeks before delivery.

The price of a set of ICNAF microfiche is \$770.00 Canadian (approximately \$555.00 US), which includes delivery by **first-class mail** in Canada and by **airmail** to all other countries. Payment in Canadian funds should accompany the order. Please address orders and make cheque (or money order) payable to:

Information for Authors in Preparing Manuscripts for NAFO Scientific Publications

General Guidelines

The manuscript should be typed in English on white paper, preferably 21.5 × 28 cm (8.5 × 11 in.), on one side only. All typing should be double-spaced with at least 2.5 cm margins around the page. Avoid breaking words at the end of lines. Number all pages, including the title page, consecutively with arabic numbers in the center of the top margin. The sequence of the material should be: title page, abstract, text, references, tables, captions for figures, and figures.

Content of Manuscript

Title page

This page should contain the title, followed by the name(s) and address(es) of the author(s) including professional affiliation, and any related footnotes. Limit the title to what is documented in the manuscript, and keep it as concise as possible.

Abstract

An informative abstract must be provided, which does not exceed one double-spaced page or about 250 words, the ultimate length being dependent on the size of the manuscript. The abstract should concisely indicate the content and emphasis of the paper. It should begin with the main conclusion from the study and be supported by statements of relevant findings. It is important that the abstract accurately reflect the paper's contents, because it is often separated from the main body of the paper by abstracting and indexing services.

Text

In general, the text should be organized into Introduction, Materials and Methods, Results, Discussion, Acknowledgements and References. Authors should be guided by the organization of papers that have been published in the NAFO Journal or Studies and by such authorities as the Council of Biological Editors Style Manual (CBE, 9650 Rockville Pike, Bethesda, MD 20814, USA). The Introduction should be limited to the purpose and rationale of the study, with literature review and other information limited to what is needed to define the problem. The Materials and Methods should provide the framework for obtaining answers to the problems which concern the purpose of the study. The Results should answer the questions evolving from the purpose of the study in a comprehensive manner, avoiding any confusion between facts and inferences and the restatement of table and figure captions in the text. The Discussion should give the main

contributions from the study, with appropriate interpretation and comparison with those of other authors. Speculation should be limited to what can be supported with reasonable evidence. In the case of short papers, it is often useful to combine Results and Discussion to avoid repetition. Acknowledgements should be limited to the names of individuals who provided significant scientific and technical support, including reviews, during the preparation of the manuscript, and the names of agencies which provided financial support.

Mathematical equations and formulae must be accurately stated, with clear definitions of the various letters and symbols. If logarithmic expressions are used, the type of function (base 10 or natural logarithms) must be clearly indicated in the text or by appropriate symbols ("log₁₀" or "log" for ordinary logarithms, and "log_e" or "ln" for natural logarithms).

References

Good judgment should be used in the selection of references, which must be restricted largely to significant published literature. References to unpublished data and documents, manuscripts in preparation, and manuscripts submitted to other journals (if not yet accepted for a particular issue) must not be cited in the list of references but may be noted in the text as unpublished data or personal communications (with full mailing address of the authors). Citation of meeting documents which have limited circulation should be avoided whenever possible, except when such documents contain significant new findings for which no other published sources of the information exist.

Literature references cited in the text must be by author's surname and year of publication, e.g. (Collins, 1960). The surnames of two authors may be used in a citation, but, if more than two authors are involved the citation should be (Collins *et al.*, 1960). The citation of mimeographed manuscript reports and meeting documents should contain the abbreviation "MS", e.g. (Collins *et al.*, MS 1960). All papers referred to in the text must be cited in the References alphabetically by the author's surname and initials, followed by the initials and surnames of other authors, year of publication, full title of the paper, name of the periodical, volume and/or number, and range of pages. Abbreviations of periodicals should, if possible, follow the "World List of Aquatic Sciences and Fisheries Serials Titles", published periodically by FAO (Food and Agriculture Organization of the United Nations). References to monographs should, in addition to the author(s), year

and title, contain the name and place of the publisher and the number of pages in the volume. Reference to a paper in a book containing a collection of papers should also contain the page range of the paper, name(s) of editor(s), and actual title of the book. The accuracy of all references and their correspondence with text citations is the responsibility of the author.

Tables

All tables must be discussed or mentioned in the text. Tables should be carefully constructed so that the data presented in them are clearly understood and that they fit within either a column or page of the periodical. Each table should start on a separate page and be headed by a description which, together with the column headings, makes the table intelligible with reference to the text. Tables must be numbered consecutively in arabic numerals, which correspond with the order of presentation in the text. The required position of tables in the text should be indicated in the left margin of the relevant page. Place the tables after the list of references.

Figures

Each photograph or drawing, described in the text, must be on a separate sheet in the form of a good quality reproduction and be numbered consecutively with arabic numerals. Lettering should not be overpowering, but should be large enough to withstand reduction of the figure to page width (17 cm) or half-page (single column) width (8 cm). To avoid the use of excessive space, many kinds of illustrations are adequately intelligible if reduced to single-column width, provided that some thought is given to the design and lettering. Black-ink line drawings and/or photographs are acceptable. Over-sized line drawings should be submitted as page-size photographs or good quality photocopies on which the dimensions of the illustrations do not exceed 17 cm wide and 20 cm high, preferably smaller. The original drawings, if larger than 17 × 20 cm, should be retained by the author and forwarded only if requested by the editor or the NAFO Secretariat. The figure number should be clearly indicated on the back or in the bottom margin of each illustration. Figure captions should be typed on a separate sheet which follows the tables in paging sequence. The approximate location of each figure in the text should be indicated in the left margin of the relevant page. A complete set of original or clear illustrations must accompany the original of the manuscript and photocopied sets must be appended to the other copies for review purposes. If the paper contains photographs of animals, organs, tissues, etc., which will not photocopy

clearly, a set of such photographs must accompany each copy of the manuscript.

Computer-generated figures should be avoided if possible, because they usually reproduce poorly. Dot-matrix printers do not produce acceptable illustrations. Figures drafted with black india ink are always preferable. Color plates are very expensive to produce and should be avoided if possible. If a color plate is essential to the understanding of the text, the author will be requested to cover the cost of its reproduction.

Manuscript Submission

Journal of Northwest Atlantic Fishery Science

The Journal publishes original research papers and notes on Northwest Atlantic fisheries science with emphasis on the environmental, biological, ecological and fishery aspects of living marine resources and ecosystems. Manuscripts are considered for publication with the understanding that their content is unpublished and is not being submitted elsewhere for publication. Each manuscript is normally reviewed by two referees for appraisal regarding its suitability as a primary article. Manuscripts (original and **three** copies) should be addressed to:

Assistant Executive Secretary
Northwest Atlantic Fisheries Organization
Bedford Institute of Oceanography
P. O. Box 638
Dartmouth, Nova Scotia
Canada B2Y 3Y9

NAFO Scientific Council Studies

The Studies publishes papers which are of topical interest and importance to the current and future activities of the Scientific Council, but which are not considered to be of sufficiently high quality to meet the standards for primary publication in the Journal. Such papers have usually been presented as research documents at Scientific Council meetings and nominated for publication by the Standing Committee on Publications. These manuscripts are not normally refereed but undergo critical scrutiny by the Studies editor and often by an expert familiar with the subject matter. Manuscripts (**one** copy only) should be addressed to:

Assistant Executive Secretary
Northwest Atlantic Fisheries Organization
Bedford Institute of Oceanography
P. O. Box 638
Dartmouth, Nova Scotia
Canada B2Y 3Y9

Scientific Publications of the Northwest Atlantic Fisheries Organization

Journal of Northwest Atlantic Fishery Science

This publication replaced the ICNAF Research Bulletin which terminated with No. 14 in September 1979. Each annual volume consists of one or more numbers.

- Vol. 1 — One number, 10 papers, 112 pages (Published December 1980)
- Vol. 2 — One number, 10 papers, 76 pages (Published October 1981)
- Vol. 3 — Two numbers, 17 papers, 180 pages (Published May and December 1982)
- Vol. 4 — One number, special issue on early stages of marine fishes, 424 pages (Published July 1983)
- Vol. 5 — Two numbers, 26 papers, 224 pages (Published January and November 1984)
- Vol. 6 — Two numbers, 17 papers, 179 pages (Published June and December 1985)

NAFO Scientific Council Studies

This publication replaced ICNAF Special Publication, which terminated with Number 11 (revised) in August 1980, and ICNAF Selected Papers, which terminated with Number 6 in January 1980. One or more numbers are published annually.

- No. 1 — Miscellaneous papers (11), 101 pages (Published March 1981)
- No. 2 — Manual on groundfish surveys, 56 pages (Published December 1981)
- No. 3 — Miscellaneous papers (8), 82 pages (Published April 1982)
- No. 4 — Papers on remote-sensing applications to fishery science (12), 98 pages (Published September 1982)
- No. 5 — Papers on environmental conditions in 1970-79 (12), 114 pages (Published December 1982)
- No. 6 — Miscellaneous papers (8), 104 pages (Published December 1983)
- No. 7 — Miscellaneous papers (9), 98 pages (Published August 1984)
- No. 8 — Miscellaneous papers (12), 96 pages (Published April 1985)
- No. 9 — Papers on squid (17), 180 pages (Published November 1985)
- No. 10 — Miscellaneous papers (9), 112 pages (Published August 1986)

NAFO Scientific Council Reports

This publication (issued annually) replaced ICNAF Redbook which terminated with the issue in December 1979.

- 1980 — Reports of seven meetings in 1979 and 1980, 190 pages (Published December 1980)
- 1981 — Reports of four meetings in 1981, 148 pages (Published December 1981)
- 1982 — Reports of two meetings in 1982, 110 pages (Published December 1982)
- 1983 — Reports of three meetings in 1983, 152 pages (Published December 1983)
- 1984 — Reports of three meetings in 1984, 126 pages (Published December 1984)
- 1985 — Reports of three meetings in 1985, 146 pages (Published in December 1985)
- 1986 — Reports of three meetings in 1986, 156 pages (Published in December 1986)

NAFO Statistical Bulletin

This publication (issued annually) replaced ICNAF Statistical Bulletin which terminated with Vol. 28 (revised). The volume numbering continues the series.

- Vol. 29 — Fishery statistics for 1979, 290 pages (Originally published July 1981; revised edition published November 1984)
- Vol. 30 — Fishery statistics for 1980, 280 pages (Originally published August 1982; revised edition published October 1984)
- Vol. 31 — Fishery statistics for 1981, 276 pages (Originally published September 1983; revised edition published March 1985)
- Vol. 32 — Fishery statistics for 1982, 284 pages (Published December 1984)
- Vol. 33 — Fishery statistics for 1983, 280 pages (Published December 1985)

NAFO List of Fishing Vessels

This triennial publication replaced ICNAF List of Fishing Vessels which terminated with the 1977 list in April 1980.

- 1980 — List for 1980, 48 pages (Published March 1983)
- 1983 — List for 1983, 43 pages (Published April 1985).

A price list for these publications may be obtained upon request. Orders for current and back issues and standing orders for future issues should be forwarded to the Executive Secretary, Northwest Atlantic Fisheries Organization, Bedford Institute of Oceanography, P. O. Box 638, Dartmouth, Nova Scotia, Canada B2Y 3Y9.
